Bedrooms
- 2.5
Bathrooms
- 3
Car Garage

The Alpine home plan is a grand and versatile 3,691-square-foot two-story design offering 4 to 7 bedrooms, 3.5 to 5 bathrooms, and a spacious 4-car garage. Designed with flexibility and luxury in mind, the Alpine features expansive open-concept living spaces, soaring ceilings, and a wide range of personalization options to fit a variety of lifestyles, including multi-generational living.

Upon entering the home, you're welcomed by an elegant staircase that creates an impressive focal point. On the opposite side of the foyer, you'll find access to a coat closet, powder room, and a spacious den—perfect for a home office, hobby room, or private sitting area. The den can also be converted into an additional main-floor bedroom, which transforms the powder room into a full bathroom for added flexibility.

Further into the home, the layout opens into a stunning main living area where thoughtful design and functionality come together. A convenient mud room provides access to the garage, while built-in cabinetry and countertop space wrap seamlessly into the expansive kitchen. The kitchen features a large island, generous counter space, and a spacious open-concept pantry, with the option to add a door for a more enclosed feel. A large window at the end of the kitchen can also be upgraded to a 6-foot sliding glass door for direct access to the included covered patio.

Across from the kitchen is the spacious dining area and a dramatic two-story great room filled with natural light from oversized windows. The great room also includes a large double sliding glass door that opens to the covered patio, creating a seamless indoor-outdoor living experience. Just off the great room is a large bonus room, which can be transformed into a private guest suite with a full bathroom.

For even greater flexibility, the Alpine offers an optional multi-generational suite that replaces the bonus room and fourth garage bay. This private suite includes its own bedroom, full bathroom, kitchenette, and sitting room, along with an optional 6-foot sliding glass door leading to the backyard—creating a comfortable and independent living space for extended family or long-term guests.

Upstairs, you're greeted by an open loft overlooking the two-story great room below. For homeowners wanting additional living space, the open great room can be enclosed to create another bedroom or a spacious bonus room. One side of the upper floor features two secondary bedrooms and a full bathroom, while the opposite side includes another bedroom with an ensuite bathroom and a conveniently located laundry room.

Privately tucked beyond the loft is the luxurious primary suite, complete with a dedicated retreat space that's perfect for a home gym, media room, sitting area, or personal sanctuary. The spa-inspired primary bathroom features a dual vanity, soaking tub, walk-in shower, and a large walk-in closet. Multiple shower configurations are available, including an extra-large custom glass shower, a large custom tiled shower, and other upgraded spa-style options for a truly personalized experience.

The Alpine also offers expanded garage flexibility, with opportunities to add additional garage bays or a dedicated shop space depending on the homesite. With its impressive architecture, flexible room configurations, and luxurious living spaces, the Alpine is designed to adapt beautifully to the way you live.
